ARES' TERRACOTTA CLEANER

POST-INSTALLATION ACIDIC CLEANER FOR TERRACOTTA TILE

Ares' Terracotta Cleaner is a powerful, acidic detergent designed for post-installation cleaning of terracotta and other acid-resistant surfaces. It effectively removes cement residues and other stubborn deposits without damaging the natural texture of the material. Perfect for restoring surfaces after installation, Ares' Terracotta Cleaner ensures a clean and pristine appearance.

TYPICAL APPLICATIONS

Ares' Terracotta Cleaner is ideal for post-installation cleaning of terracotta and other acid-resistant surfaces to remove cement residues, grime, and other stubborn dirt.

BENEFITS

- Effective Cement Removal: Removes cement residues and other tough deposits.
- Surface Safe: Maintains the natural look and integrity of acid-resistant surfaces.
- High-Efficiency Cleaning: Provides deep cleaning for newly installed surfaces.

CONTAINER SIZE

32 fl. oz. (950 mL)

CAUTION

Keep away from heat, hot surfaces, sparks, open flames, and other ignition sources. No smoking. Avoid breathing dust, fumes, gas, mist, vapors, or spray. Use only in a well-ventilated area. Use non-sparking tools when handling. Wear protective gloves, eye protection, and face protection. Ground and bond container and receiving equipment to prevent static discharge. Use explosion-proof electrical, ventilating, and lighting equipment. Wash hands and face thoroughly after handling.

FIRST AID

IF IN EYES, remove contact lenses if easy to do so and rinse immediately with plenty of fresh water for at least 15 minutes, keeping eyelids fully open. Seek immediate medical attention. IF IN CONTACT WITH SKIN, remove contaminated clothing and footwear. Wash thoroughly with running water and soap if available. Seek medical advice and avoid re-contact with contaminated clothing. IF INGESTED, do NOT induce vomiting unless explicitly advised by a medical professional. Do not give anything by mouth to an unconscious person and seek immediate medical attention. IF INHALED, move the individual to fresh air and ensure they are comfortable for breathing. If respiratory symptoms persist, keep the person warm and comfortable. Administer oxygen if necessary, and if the person stops breathing, provide artificial respiration. Seek medical attention promptly.

STORAGE

Store in the original, sealed container in a cool, well-ventilated area, away from direct sunlight. Keep away from heat sources, open flames, sparks, and other ignition points.

HOW TO USE

Ensure the surface is clean and dry before application. Begin by sweeping or vacuuming to remove loose dust, dirt, or debris. Conduct a preliminary test on a small, inconspicuous area to confirm compatibility with Ares' Terracotta Cleaner. Product Application:

- For porous and absorbent materials like terracotta, dilute 1 part cleaner with 2 parts water.
- For compact, less absorbent materials like ceramic tiles, dilute 1 part cleaner with 4 parts water.

Apply the diluted solution using a scrubbing brush or a single-disc machine with a suitable pad.

Allow the cleaner to sit for 10-15 minutes, scrubbing periodically with non-abrasive tools (white pads or soft brushes) to enhance cleaning and prevent damage.

For highly absorbent surfaces, apply additional product during the process to ensure complete coverage.

After the cleaner has been allowed to act, add clean water to create an emulsion, spread evenly, and remove excess with a wet vacuum.

Rinse thoroughly with clean water to ensure all cleaner residue is removed. For heavily soiled areas, repeat as necessary.

Allow the surface to dry completely after rinsing before using or applying any sealants.

Clean all application tools with water immediately after use.

NOTE: Ares' Terracotta Cleaner is intended for deep cleaning but does not offer long-term stain protection. Ensure all cleaner residue is removed before further treatments.

PRECAUTIONS

Use in a well-ventilated area. Wear protective gloves, goggles, and respiratory protection as necessary to avoid inhalation, skin, and eye contact. Prevent the product from entering drains or waterways, as it may pose environmental risks. Dispose of any unused product and its container in accordance with local regulations for hazardous waste.
