

ZEUS' TILE SEALER

STAIN RESISTANT SEALER FOR USE ON CEMENT TILES

Zeus' Tile Sealer is a premium, solvent-based solution engineered to deliver advanced stain resistance for highly absorbent surfaces such as cement tiles, natural stone, and concrete. This deep-penetrating sealer effectively safeguards surfaces from stains, moisture, and daily wear while preserving their natural appearance. Suitable for both interior and exterior applications, Zeus' Tile Sealer offers enduring protection and a pristine finish, ensuring long-lasting durability.

TYPICAL APPLICATIONS

Zeus' Tile Sealer is suitable for use on absorbent surfaces such as cement tiles, natural stone, and concrete.

BENEFITS

- Provides superior stain resistance on absorbent surfaces.
- Preserves the natural look of materials without altering appearance.
- Durable protection against moisture, stains, and daily wear, ensuring long-lasting results.

CONTAINER SIZE

33.5 fl. oz. (1000 mL)

HOW TO USE

Conduct a preliminary test on an inconspicuous area. Ensure the surface is clean, dry, and free from dirt, dust, grime, residues, waxes, or other treatments. For best results, treat the surface with Poseidon's Tile Primer before applying Zeus' Tile Sealer. Protect any surfaces not intended for treatment, and for newly installed surfaces, ensure grout and adhesive are fully dried.

Shake Zeus' Tile Sealer well before use. Apply a thin, even layer using a brush, roller, or low-pressure sprayer, allowing the product to penetrate for 15-30 minutes. For highly absorbent surfaces, apply a second coat after the first coat has completely dried. Avoid water exposure for at least 24 hours to ensure full drying.

Allow the sealer to dry for 2-3 hours before light traffic. Full cure and maximum performance are achieved within 24 hours. Clean all tools and equipment immediately after use with white spirit or a suitable solvent cleaner.

NOTE: Zeus' Tile Sealer does not protect against surface etching from acidic substances like urine, nor does it prevent scuff marks or scratches. However, it will simplify maintenance and cleaning of treated surfaces. Once fully cured, this product is safe for contact with food. Clean up spills promptly to reduce potential absorption.

PRECAUTIONS

Prioritize the use of adequate technical equipment to ensure a safe working environment. Ensure the area is well-ventilated, ideally with effective local aspiration to maintain air quality. Use proper personal protective equipment (PPE), including gloves, eye protection, and a respirator if ventilation is limited. For application, rely on tools designed for chemical use, such as a low-pressure sprayer, brush, or roller, to apply Zeus' Tile Sealer safely and effectively.

CAUTION

Keep away from heat, hot surfaces, sparks, open flames, and other ignition sources. No smoking. Avoid breathing dust, fumes, gas, mist, vapors, or spray. Use only in a well-ventilated area. Use non-sparking tools. Wear protective gloves, eye protection, and face protection. Ground and bond container and receiving equipment. Take precautionary measures against static discharge. Use explosion-proof electrical, ventilating, and lighting equipment. Wash hands and face thoroughly after handling.

FIRST AID

IF IN EYES, remove contact lenses if easy to do so and rinse immediately with plenty of fresh water for at least 15 minutes, keeping eyelids fully open. Seek immediate medical attention. IF IN CONTACT WITH SKIN, remove contaminated clothing and footwear. Wash thoroughly with running water and soap if available. Seek medical advice and avoid re-contact with contaminated clothing. IF INGESTED, do NOT induce vomiting unless explicitly advised by a medical professional. Do not give anything by mouth to an unconscious person and seek immediate medical attention. IF INHALED, move the individual to fresh air and ensure they are comfortable for breathing. If respiratory symptoms persist, keep the person warm and comfortable. Administer oxygen if necessary, and if the person stops breathing, provide artificial respiration. Seek medical attention promptly.

STORAGE

Store in the original, sealed container in a cool, well-ventilated area, away from direct sunlight. Keep away from heat sources, open flames, sparks, and other ignition points.
